Message From The Chair

Monsoons and triple-digit temperatures spell summer in Tucson. With that, we welcome the host of new residents, fellows and faculty physicians—many of whom began their clinical training and service at the start of this month. To ease any confusion about who’s who, we refer you to a new DOM Core & Key Clinical Faculty Guide from our Vice Chair of Education Office, which also recently added Faculty Development self-training and mentoring modules on topics such as "Teaching in an Ambulatory Setting," "Educational Portfolios" and "Scholarship in the Digital Age" to our website. Another new item online is an E-Newsletter Archive that includes not just current and past issues of this newsletter, but earlier departmental newsletters stretching back to 2007. Look at how much we’ve grown and changed over the years. Speaking of growing, excavation for the basement of the new Health Sciences Innovation Building (HSIB) began this past week and one of two 360-plus-foot cranes arrived onsite for the new Banner – UMC Tucson hospital tower. I would point you to the new UAHS Campus Construction Updates website, where you can see live webcams of construction on all three building projects—including the new BioScience Research Laboratories (BSRL)—as well as the latest newsletters for each and an overall construction site map to let you know where to park and how best to get there. If you have any ideas on web updates or news items to include in upcoming issues, please send them to communications coordinator David Mogollón, 626-1137.

Monica Kraft, MD
Robert & Irene Flinn Professor of Medicine
Chair, Department of Medicine
University of Arizona College of Medicine – Tucson
SPOTLIGHTS

New IDSN Coccidioidomycosis Guidance Led by Valley Fever Center Director
UA Valley Fever Center for Excellence Director John Galgiani, MD, is the lead author on updated guidance from the Infectious Diseases Society of America for primary care physicians and other clinicians on treatment and care of patients suffering from coccidioidomycosis, a disease caused by fungal spores endemic to soils of the Southwest and known as Valley Fever...

UA Geriatrics Chief Supports Senate Bid to Advance At-Home Primary Care
As American Academy of Home Care Medicine president, Mindy Fain, MD—chief of the UA Division of Geriatric, General Internal and Palliative Medicine and co-director of UA Center on Aging—joins backers in Washington, DC, to introduce new legislation to make Medicare’s Independence At Home pilot program permanent. She’s quoted in press release promoting the U.S. Senate Bill 3130’s July 6 introduction with bipartisan support and 100-plus groups advocating its passage...
