July 2016

## Message From The Chair

Monsoons and triple-digit temperatures spell summer in Tucson.

With that, we welcome the host of new residents, fellows and faculty physicians—many of whom began their clinical training and service at the start of this month. To ease any confusion about who's who, we refer you to a new **DOM Core & Key Clinical Faculty Guide** from our Vice Chair of Education Office, which also recently

added **Faculty Development** self-training and mentoring modules on topics such as "Teaching in an Ambulatory Setting," "Educational Portfolios" and "Scholarship in the Digital Age" to our website. Another new item online is an **E-Newsletter Archive** that includes not just current and past issues of this newsletter, but earlier departmental newsletters stretching back to 2007. Look at how much we've grown and changed over the years. Speaking of growing, excavation for the basement of the new Health Sciences Innovation Building (HSIB) began this past week and one of two 360-plus-foot cranes arrived onsite for the new Banner – UMC Tucson hospital tower. I would point you to the new **UAHS Campus Construction Updates website**, where you can see live webcams of construction on all three building projects—including the new BioScience Research Laboratories (BSRL)—as well as the latest newsletters for each and an overall construction site map to let you know where to park and how best to get there. If you have any ideas on web updates or news items to include in upcoming issues, please send them to communications coordinator [David Mogollón](#), 626-1137.

### **Monica Kraft, MD**

Robert & Irene Flinn Professor of Medicine  
Chair, Department of Medicine  
University of Arizona College of Medicine – Tucson

## SPOTLIGHTS
