October 2016

Message From The Chair

The UA Department of Medicine General Faculty Meeting on Sept. 19 offered a great opportunity for physicians and investigators within our department to hear about a number of key initiatives under way.

I expect all faculty not present to watch the [video of the meeting](#) so they're up to date on these issues including compensation, initiatives to improve clinical workflow and efficiency, and new DOM metrics that we as a department must achieve this year. We are planning our next meeting for November, so stay tuned.

Dr. Pradeep Kadambi, BUMG chief clinical affairs officer, and Banner Health CFO **Jeff Buehrle** provided an update on the Physician Compensation Plan; new BUMG COO **Scott Hofferber** discussed our Financial Performance Improvement Plan; and **Dr. Gordon Carr**, BUMCTS CMO, gave an update on the Cerner roll-out.

As of July 1, 2016—in addition to start dates for 30 new faculty members we've added to our roster—the “shadow” or “early opt-in” period began in which physicians may choose between the prior UAHN or future Banner compensation model for the current fiscal year. You have until Dec. 1 to decide, but are guaranteed the higher of the two. As of July 1, 2017, all physicians will be using the Banner model. Dr. Kadambi and DOM Administrator **Todd Boltz** spoke about related scorecards then in review by clinical chiefs to give everyone an idea of what to expect and the SBAR process to request changes.

Hofferber—who has academic medical center experience with Missouri, UCSD and Emory (where he worked with **Drs. Tom Boyer, Steve Goldschmid** and **Andrew Yeager**)—spoke about strategies and opportunities “or revenue waterfalls” to reduce the practice plan deficit and get to a more sustainable model. On collections alone, that opportunity could be up to \$12 million, he noted. The goal is to break even for the 2018 calendar year. It is worth hearing what he has to say

in the video about this.

The plan with Cerner is to go live next June, said Dr. Carr, who showed the full timeline as well as expected go-live support in his presentation. The plan includes about eight hours of classroom training beginning in early spring. He encouraged everyone to take advantage of preview sessions called “Cerner Experience Demos” announced in the BUMG Wildcat Connection newsletter to see how your workflows may be affected.

At the meeting, I discussed new DOM metrics, something of which all our faculty should be aware. They’re to enhance performance of our department in key strategic inpatient and outpatient areas:

1. Blood & platelet transfusions
2. Discharge timeliness
3. Number of new outpatient visits

I also announced that **Dr. Tammy Clark Ojo** will be joining DOM leadership as our new Vice Chair for Clinical Affairs. She brings to the post valuable experience in clinical optimization strategies from her time at the University of Michigan. Please offer your congratulations and cooperation to her as we move forward.

Monica Kraft, MD

Robert & Irene Flinn Professor of Medicine
Chair, Department of Medicine
University of Arizona College of Medicine – Tucson

SPOTLIGHTS

\$1 Million Gift to Support Integrative Medicine at UA Health Sciences

Chicago-area philanthropist **Jolita Leonas-Arzbaecher** shares a passion for the work of **Dr. Andrew Weil**, integrative medicine pioneer and director of the UA Center for Integrative Medicine. Her \$1 million gift will advance the work of the center at the UA Health Sciences and beyond...

New Hematology-Oncology Chief Looks Forward to ‘Homecoming’

A National Cancer Institute Head and Neck Cancer Steering Committee member and a local high school grad, **Dr. Julie E. Bauman** focuses her research on "green chemoprevention"—using plants or simple extracts to help the body detoxify carcinogens, battling a throat cancer epidemic caused by HPV, and the emerging field of immuno-oncology—novel treatments to activate our immune system to fight cancer...

CyVerse Explores Complexities of Mapping the Human Immune System

CyVerse collaborator **Dr. Adam Buntzman**, an investigator in the lab of **Dr. Monica Kraft**, a physician-scientist specializing in research of dysfunctional autoimmune response in asthma and chair of the UA Department of Medicine, has led an effort to harness supercomputers to create the first map of the human immune system...

UPCOMING EVENTS

OCT 10	Advances in Aging Lecture with Dr. Corinne Self	OCT 13	DOM Research Seminar with Drs. Roy-Chaudhury & Koshy	OCT 15	Living Healthy With Arthritis Active Series - 'Totally Tubing'
------------------	---	------------------	--	------------------	--

UPCOMING EVENTS

OCT 22	BRA Day with UA Breast Health Team at Komen Arizona	OCT 27	UACC Open House - 'Pancreatic & Liver Cancer Awareness'	OCT 28-29	College of Medicine – Tucson Homecoming 2016
------------------	---	------------------	---	---------------------	--

RESEARCH

Standing Room Only for Initial DOM Research Seminar

The DOM Research Seminar Series launched Sept. 8 with seats full to hear **Drs. Monica Kraft** and **Julie Ledford** discuss "Surfactant Protein-A & Asthma: From Basic Science to Translational Research." Next speakers: **Dr. Prabir Roy-Chaudhury**, chief, Division of Nephrology, and **Dr. Anita Koshy**, assistant professor of Neurology and Immunobiology, Thursday, Oct. 13. Click on the flyer to see their program...
