May-June 2017

Message From The Chair

Summer is upon us, unleashing a heatwave unlike any seen in a couple of decades in Southern Arizona.

On June 19, the temperature hit 115°F—tying a record. The next day at 3:56 p.m., it hit 116°F—breaking the record. The National Weather Service issued an excessive heat warning that's in effect until the end of the week. A dip is predicted, but we can expect daily highs to fluctuate in and out of the teens as we wait for the monsoon season to start.

With a myriad of health issues affected by the heat (see **Dr. John Galgiani** on Valley fever in a recent KGUN9 broadcast and me on asthma and COPD on KVOA News4 in the [“COM-T in the News”](#) section of the new Workplace by Facebook app—more on that below), it's a good time to visit Summerhaven on Mount Lemmon (*left*), go north to Flagstaff/Sedona, Prescott or the White Mountains, or west to beaches in San Diego or Rocky Point. If you stay home, keep indoors or confine your outdoor activities to early morning or evenings. Always take water with you and stay hydrated.

That said—as you can see by the plethora of notices in this newsletter—things are not cooling off any time soon in the UA Department of Medicine. Faculty and staff have been going gangbusters, as have fellows and residents. We welcome a new crew of trainees over the next few weeks. Congratulations to those who recently graduated from our nearly 20 ACGME-accredited training programs.

I'm also very excited about the news that the UA-Banner Academic Management Council approved lifting the post-employment non-compete clause from Tucson provider contracts with Banner – University Medical Group. It's a huge positive for our recruitment and retention efforts. Read more about it below.

Monica Kraft, MD

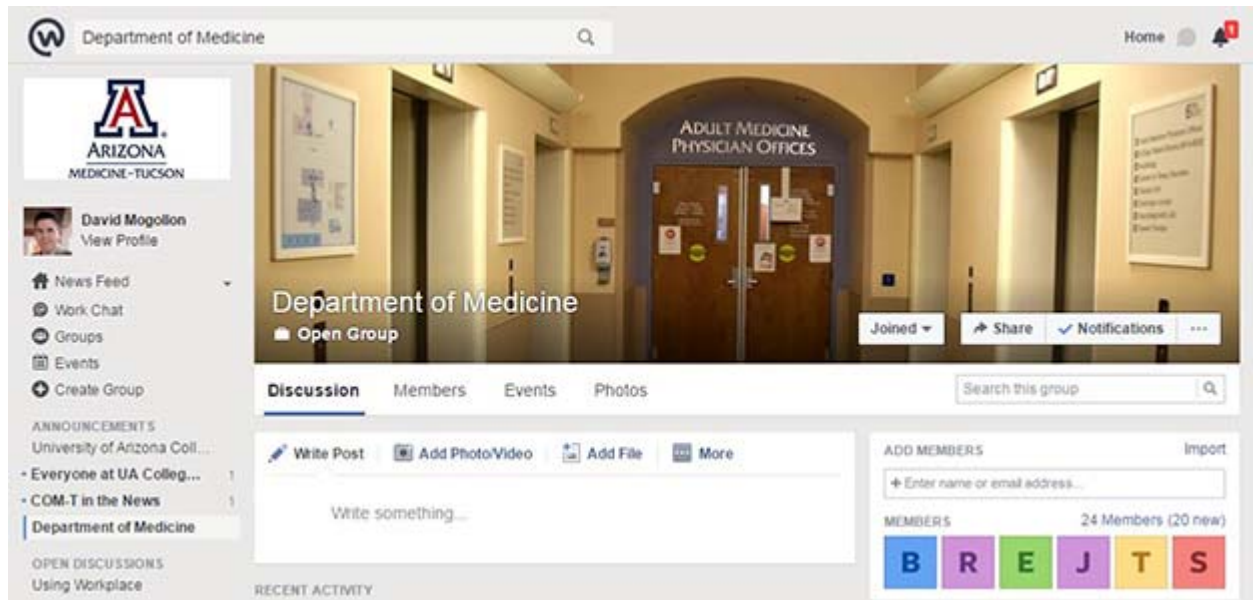

Robert & Irene Flinn Professor of Medicine
Chair, Department of Medicine
University of Arizona College of Medicine – Tucson

SPOTLIGHTS

Class of 2017 Internal Medicine Residents Celebrate Graduation with Honors

At the graduation dinner for the Class of 2017 members of the University of Arizona Internal Medicine Residency Program – Tucson Campus, a number of awards were presented—some in recognition of the hard work of three year’s training, others in just—reflecting the camaraderie developed in that time. View the photo gallery and see who won awards. [Click here](#) for coverage of the South Campus internal medicine residents' grad night event at the Omni Tucson National Resort...

UA College of Medicine First in Higher Ed to Adopt Workplace by Facebook

By now, you’ve likely seen the emails from Dean **Charles Cairns, MD**—et al.—announcing the roll-out in June at the UA College of Medicine – Tucson of the Workplace by Facebook app, a collaborative platform to serve as the college’s intranet communications tool. Staggered invitations are being delivered via email to faculty and staff, with a goal of having fellows, residents and Banner folk on by summer's end...

Medicine Chair's Senate Testimony at Odds with ADEQ Chief on Air Quality

Testimony to a U.S. Senate subcommittee by DOM Chair **Dr. Monica Kraft** on legislation to relax air quality standards stirred a bit of controversy as reported in an article from Cronkite News. Citing their potential health impact related to asthma, Dr. Kraft spoke against two Senate bills (S. 263 and S. 452) that co-panelist Arizona Department of Environmental Quality Director **Misael Cabrera** supported...

KIMBERLY ANDREWS ESPY AND LEIGH A. NEUMAYER BY TURN

UA research helps Arizonans breathe easier

On April 20, Congress reached a bipartisan agreement to boost funding by \$2 billion for the National Institutes of Health. The priority areas to make medical research a national priority come as an auspicious time, the eve of National Asthma and Allergy Awareness Month.

researchers with this approach will use prevent or minimize asthma severity level (lower level in life's highest risk for asthma).

Over 100 million live in the US with asthma and other states will naturally increase the asthma prevalence in the study.

Dr. Monica Kraft, department medicine at UA College of St. Joseph, who specializes in trial asthma research, is using her own NIH award to identify the factors related to surfactant that help control lung inflammation.

Surfactant is a substance that coats the lungs and helps to open up airways so lungs can expand properly breathing.

New and better medicines

The ultimate goal of these projects is to produce new or improved medicines that could be widely administered to those most at risk to reduce as

April showers bring May flowers, but for those who suffer from asthma and allergies, May often brings the worst of symptoms. Allergic irritants can cause bouts of coughing, difficulty breathing and respiratory infections. In these severe cases, asthma sufferers may have

A recent *Arizona Republic* op-ed article co-written by the UA senior VPs **Drs. Kimberly Andrews Espy** (research), and **Leigh Neumayer** (health sciences), on federally funded research under way at the UA to ease breathing woes of those suffering from asthma. The May 31 article spotlights the work of **Drs. Fernando Martinez** and **Monica Kraft**, both of whom received large NIH grants in the past year...
