September 2017

Message From The Chair

There is a lot happening in the Department and College of Medicine as usual. The Cerner transition takes place Oct. 1. I want to thank our amazing faculty for the engagement and leadership you have shown as we work with our clinic and inpatient staff to create the necessary workflows to continue delivering outstanding patient care.

We also are now in the thick of recruiting season for fellow and resident candidates to join our 20 ACGME-accredited physician-training programs in internal medicine and all of its subspecialties from cardiology to rheumatology.

And, by all indications, we're doing much better at attracting more and better quality candidates, both internally and from outside the UA College of Medicine – Tucson. That is what I hear from all our fellowship and residency program directors, including **Drs. Laura Meinke** and **Gene Trowers**, who head the UA Internal Medicine Residency Programs at Tucson and South campuses.

To boost retention for some of our own stellar medical students, **Dr. Jil Tardiff**, DOM vice chair for research, and I are working with those programs to hold recruitment sessions in October where we hope to wow them with all the dynamic, innovative initiatives across our 14 divisions. Interviewers are still needed, so please reach out to **Kerith Lisa**, senior program coordinator with the Tucson internal medicine residency program, to volunteer. Remember, we want to put our best foot forward. Everyone contributes to that, if only by the highly professional and charismatic way we deal with colleagues, trainees, students, etc.

That said, a new DOM Education Committee was formed to build on this momentum. Several **medicine core and key clinical faculty** are on the committee, including internal medicine residency directors and associate directors, as well as **Drs. Dalia Mikhael, Indu Partha, Serena Scott, Anna Stepczynski** and Division of Inpatient Medicine Chief **Tejo Vemulapalli**. One of their efforts is to beef up our Residents-As-Teachers Program, which now has 30 active residents signed up. Look for training sessions to enhance focus on giving better presentations and other educational topics.

As we would like residents to stay on as fellows here, this is a natural way to enhance what we offer them in terms of professional development support and other opportunities. Our recent DOM Fellows Retreat (see news item below) does much the same thing for those physicians in advanced training here. As UA College of Medicine – Tucson Dean **Dr. Charles Cairns** said at our summer DOM General Faculty Meeting, at each level from student to resident to fellow—retention of these talented individuals increases the odds they’ll stay in the state of Arizona and contribute to the future of health care here.

Dr. Tardiff noted, one thing builds on another: “The bottom line is, as we try to improve the academic profile of the department, we want to build more broad-based academic fellowships. To those aims, we are increasing our percentage of fellows with significant prior research experience with a goal of identifying those who plan to follow a career in academic medicine. And, along those lines, we’re developing new programs requiring research to help facilitate progress in their academic resumés.”

This results in a greater quality of research performed at the UA Department of Medicine, which has been reflected in greater awards of research funding across all of our divisions. UAHS New Award reports for **June, July** and **August** underscore the success our faculty are having in that regard. Many of these awards dovetail nicely into initiatives of the UA College of Medicine and UA Health Sciences to accentuate our clinical and research strengths in diabetes, aging and lung care.

To that end, I congratulate you all. Let’s keep up the momentum.

Monica Kraft, MD

Robert & Irene Flinn Professor of Medicine
 Chair, Department of Medicine
 University of Arizona College of Medicine – Tucson

SPOTLIGHTS

Full Steam Ahead for Cerner Electronic Health Record Go-Live, Oct. 1

The launch of the new Cerner electronic health record (EHR) at Banner – University Medical Center Tucson and South will proceed as scheduled this weekend, with go-live set for just after midnight on Oct. 1. More than 1,200 adoption coaches will provide support over the next several weeks. See last-minute suggestions as well as links to a transition overview and archived video from Sept. 26 UA/Banner Cerner Town Hall and a mini-photo gallery of DOM staff preparing...

More Than One Path to Success, DOM Fellows Learn at 2nd Annual Retreat

This year's DOM Fellows Retreat was well attended with about 55 fellows and fellowship directors participating Sept. 19, in the UA Cancer Center's Kiewit Auditorium. Headlining were **Drs. Monica Kraft, Joe G.N. "Skip" Garcia, Tara Carr, Anita Koshy and Sai Parthasarathy.** **Drs. Keng Pineda and Omavi Bailey** also led breakout discussion groups. **Dr. Jil Tardiff**, department vice chair for research, organized the event. See the photos, watch the video...

Roughly 600 Show with CVs in Hand for Banner Health Tucson Hiring Event

An overwhelming number of job seekers showed up Sept. 14 for a Banner Health Hiring Event at Banner – University Medical Center Tucson. A steady stream filled DuVal Auditorium to apply for 250 available positions posted for Banner – UMC Tucson and South clinical facilities and the UA Cancer Center at the North and Orange Grove campuses. See the photos and visit our new [DOM Recruitment](#) webpage to learn more about available jobs...

RESEARCH

How to Get Your Study Listed on UAHS Research Site

For UA Department of Medicine faculty and staff members involved in clinical research seeking to get their studies listed on the UA Health Sciences Clinical Research Studies website, look for tips here. The process is simple. Just fill out the “Optional Services” page of the Research Intake Form. In other news, visit the [DOM Research](#) website main tab for a new archive of departmental lecture series...
