

Open House.

July 28th 2016

5:00 – 7:00pm

University of Arizona Cancer Center – North

3838 N Campbell Ave, Tucson, AZ 85719

Clinical Trials

Daruka Mahadevan, MD, PhD, is a Professor of Medicine, a recognized expert and highly experienced physician-scientist in the UA Division of Hematology & Oncology, and currently the Director of Phase I Clinical Trials Program and Co-Director of Experimental Therapeutics at the University of Arizona Cancer Center.

As Director of the Phase I Program, he conducts first-in-human clinical trials with new drugs for patients with all solid tumor types as well patients with myelodysplastic syndrome (MDS), chronic lymphocytic leukemia (CLL) and non-Hodgkin lymphoma (NHL). His research interest focuses on discovering novel therapeutic targets through a rigorous validation process and then design drugs to these targets using a structure-based drug discovery algorithm.

Dr. Mahadevan's expertise in the above tumor types is that he conducts both Phase I and II first-in-human therapeutic trials in patients who have failed front line therapies.

Daruka Mahadevan, MD, PhD, and his team will present on UACC's Phase I Clinic Trials Program. Light refreshments and soft entertainment will be provided.
