

SEPTEMBER 30, 2004

Yun-Cai Liu, Ph.D.

La Jolla Institute for Allergy & Immunology
San Diego, CA

*Protein Ubiquitination in
Immune Regulation*

OCTOBER 21

Gurjit Khurana-Hershey, M.D., Ph.D.

Cincinnati Children's Hospital
Cincinnati, OH

Signals on the Road to Asthma

OCTOBER 18

Terry Machen, Ph.D.

University of California, Berkeley
Berkeley, CA

*Innate Immune Defense in Lung Airways:
Epithelial Cell Functions and
Pseudomonas Aeruginosa Products*

DECEMBER 9

Janis Burkhardt, Ph.D.

Children's Hospital of Philadelphia &
University of Pennsylvania
Philadelphia, PA

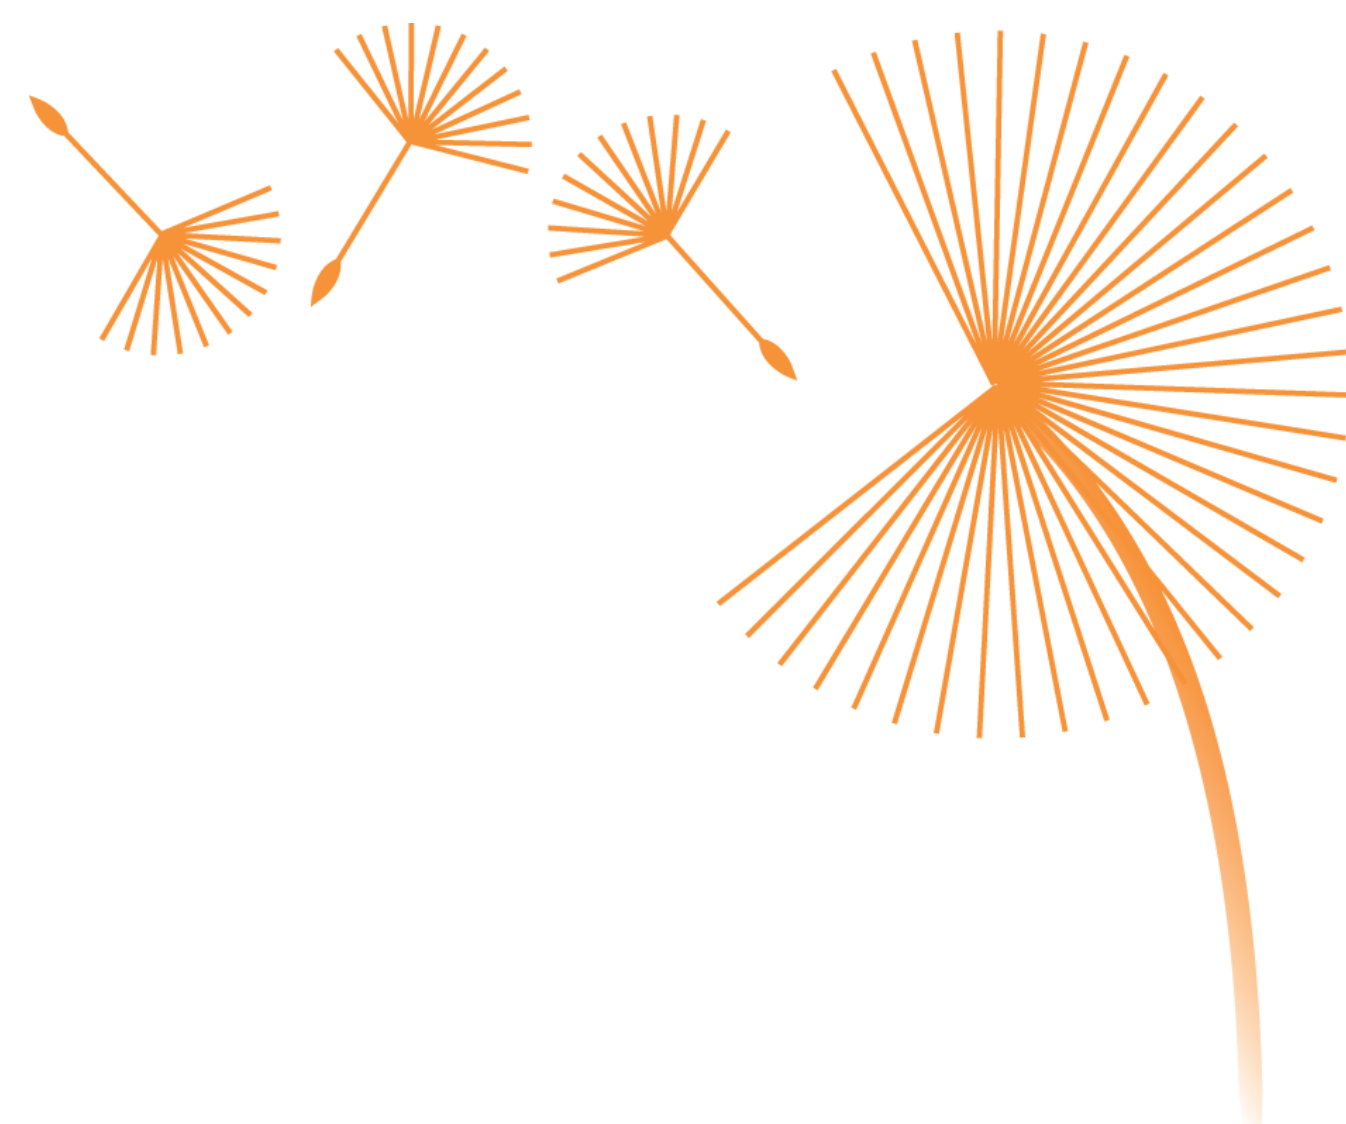

*Cytoskeletal Regulation of T Cell
Activation*

JANUARY 20, 2005

Talal Chatila, M.D.

UCLA
Los Angeles, CA

*Genetic Dissection of IL-4R Alpha
Signaling Pathways in Allergic Airway
Inflammation*

Arizona
Respiratory
Center

FEBRUARY 10

Peter Heyman, M.D.

University of Virginia
Charlottesville, VA

*Wheezing Exacerbation in Children and
Young Adults: The Role of Viral Infections
in the Context of Age and Atopy*

FEBRUARY 24

Kim Bottomly, Ph.D.

Yale University School of Medicine
New Haven, CT

*Innate Immune Receptors and the
Induction of Lung Inflammatory Responses
in a Murine Model of Asthma*

APRIL 21

Qutayba Hamid, M.D.

McGill University
Montreal, Canada

Advances in the Pathogenesis of Asthma

APRIL 28

Dean A. Befus, Ph.D.

Alberta Asthma Centre
Alberta, Canada

*Spit Happens: Neuroendocrine Regulation
of Allergic Inflammation in the Airways*
