

# The Benjamin Burrows

# Lung Immunobiology Seminar Series

2005-06

**OCTOBER 20, 2005**

**Gabriele Grunig, DVM, Ph.D.**

Columbia University  
New York, NY

*IL-13 and Pulmonary Antigen  
Presenting Cells*

**NOVEMBER 10**

**Jerrold P. Weiss, Ph.D.**

University of Iowa  
Iowa City, IA

*Regulation of Interactions of Endotoxin  
With Host Cells*

**FEBRUARY 2, 2006**

**Geoffrey McLennan, M.D., Ph.D.**

University of Iowa  
Iowa City, IA

*Trying to Understand Lung Structure and  
Function Through  
Digital Imaging – A Lead-in to  
Personalized Medicine*

**FEBRUARY 23**

**Marsha Wills-Karp, Ph.D.**

Cincinnati Children's Hospital  
Cincinnati, OH

*Immunoregulation and Asthma*

**MARCH 23**

**Anna Di Rienzo, Ph.D.**

University of Chicago  
Chicago, IL

*The Ancestral Susceptibility Model for  
Common Diseases*

**APRIL 20**

**Gary W. Hunninghake, M.D.**

University of Iowa  
Iowa City, IA

*Effect of RSV on Airway Epithelium*

**APRIL 27**

**William W. Busse, M.D.**

University of Wisconsin  
Madison, WI

*Respiratory Infections and Asthma:  
Is Rhinovirus the Primo Infection?*
