

# National DNA Day 2020

## WHAT IS NATIONAL DNA DAY?

National DNA Day is a unique day when students, teachers and the public can learn more about genetics and genomics! The day commemorates the completion of the Human Genome Project in April 2003, and the discovery of DNA's double helix in 1953.

**When: April 20-24, 2020**

The University of Arizona, Department of Immunobiology, is organizing this event again this year and visiting local high schools. **Last year the event was very successful!** We visited 3 high schools and worked with over 600 biology students!

## Participation Form (for high schools):

If you would like to participate in this event and have the University of Arizona visit your classroom, please fill out this participation request [Participation Form](#)

## Volunteers NEEDED (for UA students):

The event can only be successful with the help of AMAZING VOLUNTEERS!

If you would like to volunteer for this event please sign up here: [VOLUNTEER](#)
