Medicine Grand Rounds

“Turning the Tide: How we Doubled the Survival of Patients with Renal Medullary Carcinoma”

Speaker: **Pavlos Msaouel, MD, PhD**

University of Arizona College of Medicine – Tucson
Lecture Hall, Room 5403

1501 N. Campbell Ave., Tucson, AZ 85721

Noon – 1:00 pm | Wednesday, April 23, 2025

– A light lunch will be provided. –

About the Presenter: Dr. Pavlos Msaouel is a physician-scientist dedicated to kidney cancer research, with a particular emphasis on rare subtypes such as renal medullary carcinoma. His laboratory identified the serum biomarker currently used to monitor cancer burden in most patients with renal medullary carcinoma, as well as many of the targeted therapies currently used for this disease. These discoveries were accelerated by his introduction of modern data science approaches to research and clinical practice. He serves as the principal investigator of several completed and ongoing clinical trials for rare and common kidney cancers, including the first such trials designed specifically for renal medullary carcinoma.
