**About the Presenter:** Shailja Shah, MD, MPH, is an associate professor of medicine at the University of California San Diego, a staff gastroenterologist at VA San Diego Health Care, and a member of the Cancer Control Program at Moores Cancer Center. Her research and public policy initiatives promote gastric cancer prevention and early detection efforts, such as gastric cancer screening and preneoplasia surveillance, among high-risk groups. She and her research team conduct large-scale epidemiological studies, decision-model analyses, and translational studies evaluating the interaction of gene x environment interactions on gastric cancer risk.
