Friday Frontiers in Biomedical Science

Designed to engage researchers and clinicians at all stages of career development, the upcoming seminar features research from Julie G. Pilitsis, MD, PhD, MBA, new chair of the Department of Neurosurgery and physician executive for functional neurosurgery for the Banner Neurosciences service line, and James K. Liao, MD, FACP, FACC, department chair and professor of medicine.

The two speakers will share a 20-minute overview of their work, with an opportunity for audience engagement.

Neuromodulation: On the Cutting Edge of Research

Rho-associated Kinase (ROCK) as a Therapeutic Target for Fibrotic Diseases

Friday, February 9, 3-4 p.m.

Keating Bioresearch Building
BIO5, Room 103, remote option
Refreshments provided.

Hosted by the College of Medicine – Tucson and co-sponsored by the Arizona Biomedical Research Centre.
