"Non-celiac gluten sensitivity: A true disease or misdiagnosis?"

Nicholas J. Talley, AC, MD, PhD, FAHMS, FRACP

Laureate Professor

Pro Vice-Chancellor, Global Research, University of Newcastle, Australia

Editor-in-Chief, Medical Journal of Australia

Senior Staff Specialist, John Hunter Hospital

Objectives:

- Distinguish non-celiac gluten sensitivity (NCGS) from wheat allergy, celiac disease and “celiac lite” cases
- Identify the relationship between functional GI disorders (IBS and functional dyspepsia) and NCGS
- Recognize new potential biomarkers of NCGS including duodenal pathology (eosinophils) and immune activation
- Estimate the benefits versus risks of a gluten free diet in NCGS

This session will be open to all staff and faculty of the UA College of Medicine – Phoenix and to all physicians and staff at Banner University Medical Center – Phoenix
