Subject: [ua-banner-pmi] All of Us Research Program - Volunteers Needed!

Dear UA-Banner *All of Us<sup>SM</sup>* Team,

As we draw closer to the soft launch of the *All of Us<sup>SM</sup>* Research Program, we are developing a list of volunteers (called friendlies) to schedule for our Alpha Phase. Friendlies are considered to be you, your family, close friends, and colleagues. The Alpha Phase will last about two weeks and the purpose is to test systems and processes with real participants.

Please note that appointments during this phase could last up to two hours. Your patience during this initial process is greatly appreciated and your feedback will allow us to improve our processes prior to the national launch of the program.

The appointment process will consist of completing a consent form, three surveys called participant provided information, physical measurements (blood pressure, heart rate, etc.), blood draw, urine collection, and a brief survey on your participant experience. You may be able to complete consent and participant provided information online before your actual appointment, and we will provide information when you sign up.

To be one of the first to participate in this landmark initiative, we only need the first and last name, email address, and phone number for you or someone you know who you are referring as a volunteer. Please make sure to check with the person you are referring before providing us with their contact information.

Information can be sent to [AllofUsAZ@email.arizona.edu](mailto:AllofUsAZ@email.arizona.edu). Once received, we will reach out to everyone to begin the scheduling process. We have a limited number of appointments, so please act quickly.

Please feel free to forward this email to your family and friends, encouraging them to submit their contact information to the email address above.

Thank you for your interest and we look forward to your participation in the *All of Us<sup>SM</sup>* Research Program.

Sincerely,

Dr. Akinlolu Ojo  
Dr. Beth Calhoun  
Dr. Usha Menon  
Dr. Eric Reiman
