Community Education Event

Pancreatic & Liver Cancer Awareness

More than 53,000 new cases of pancreatic cancer are diagnosed in the U.S. every year, and the number continues to climb. Pancreatic cancer is now the third leading cause of cancer deaths in the country. Liver cancer is newly diagnosed in 29,000 people in the U.S. annually. Please join us to raise awareness in our community, learn how to reduce your risk of developing one of these cancers, and to learn about the current treatment options.

Presenters:

Dr. Emad Elquza MD	Opening remarks
Steve Malangone FNP-C	Risk reduction & early detection
Dr. Tun Jie MD	Surgical management of liver cancer
Dr. Taylor Riall MD	Surgical management of pancreatic cancer
Dr. Agnieszka Witkiewicz MD	Personalized treatment for pancreatic cancer

Jerrelee Hollings PharmD will also be available to answer individual questions regarding medications prior to the presentation.

Thursday, October 27th, 2016

5:00-7:00pm

University of Arizona Cancer Center

3838 N Campbell Avenue
